WORK EXPERIENCE

Programmers Forum

Jun 2017 — Present

Web Developer and Designer

Developed website for college programming club, implemented discussion forum with upvote/downvote using JQuery, activity section (like notifications), posts by admins, points to each user, etc. Currently working with web scraping to retrieve data from coding websites by taking user's username.

Technologies: Python Django (backend) Bootstrap 4 (frontend)

Temporary link: <https://baqir.pythonanywhere.com>

Github: <https://github.com/baqir00/ProgrammersForum>

Code It

Aug 2016 — Dec 2016

Web Developer

Developing a website that asks for username/password of spoj.com, crawls all the solutions of it and saves it and then users can see solution of any question ordered by time/space complexity. Users can also follow people which allows them to keep track of the latest questions submitted by them since users last login.

Technologies: Python Django (backend) Twitter Bootstrap (frontend)

Github: <https://github.com/baqir00/CodeIt>

RP Unit, ZHCET

Sept 2015 — Nov 2016

Web Developer

College website responsible for showing results, student feedback, student/teachers profile, course registration. Responsible for handling live data of students and adding new functionality and features almost always.

Technologies: PHP (backend) , MySQL (Database) , Bootstrap and AJAX (frontend)

Website: <https://ctengg.amu.ac.in>

Career path to choose

Aug 2017 — Present

Final Year Project

Creating a platform that would test user in 4 rounds and give results on which career path to choose after doing graduation in Computer Science. The project would consist **Natural Language Processing of CV, Web Scraping, Coding test** using API's, **subjective answer analysis**, etc. Back-end would be on Python-Django and deadline is May 2018.

QUALIFICATIONS

Good Communication skills, have worked in teams in past, can find short and smart solutions to even the most complicated problems.

Languages: C++, Python, PHP

Frameworks: Django, Bootstrap

ACHIEVEMENTS

- **Android Application:** Created basic time table app which would highlight class happening currently
- **Start Up:** Worked for free at a startup **clickdesti.com** as web designer for 5 months
- **Tutorsvilla:** Worked in **CSS** and **PHP** in **startup** by seniors that would connect student and tutor
- **Google and Instagram API:** Created small project that would take the location name and display Instagram images taken on that location
- **TCS Codevita:** Secured **194 rank** in round 1 and **800 rank** in round 2 in 2016 codevita
- **Hackerrank:** **2300+** points in Algorithms section of hackerrank, **Won \$100 AWS credits** in **Epic Code 2015 (@baqirkhan00)**
- **SPOJ:** Solved **120+** Problems, **World rank 3495, University rank 2 (@baqir96)**
- **Quora:** **264.8K** views, 50 answers (**@Baqir-Khan**)
- **Linkedin:** **100+** Endorsements, **345+** Connections (**@baqirkhan**)
